

## Instructions:

Replace **[bracketed red text]** with the requested information or screen capture.

Replace **bracketed red text** with black text.

**PLEASE do not include full page, full window screen shot images**, or full screen shots that have been reduced in size.

Use a snippet tool to capture parts of the screen and insert those images into the template.

**Do not remove tags from this template. An example of a tag is [C01]. All fields are required.**

*Please do not alter template formatting or delete parts of this template.*

## Part A - Student Information:

1. Student Name: Brian Salinas
2. Class Designation: IN-CLASS
3. Did you complete the activity before starting this assignment? Yes
4. Did you work with any other students on this assignment? No

## Part B –CMS Webhost Information:

1. Which web host did you use for this assignment, **Shared web-host** SiteGround (another shared web host) or Pantheon or Cloud web development environment?

SiteGround

## Part D – Drupal 8 Site Configuration

### Drupal 8 Screen Captures:

1. SCREEN CAPTURE – Backend Account Settings, REGISTRATION AND CANCELLATION  
Admin toolbar > Configuration > Account settings, Registration and Cancellation

The screenshot shows the Drupal 8 Admin toolbar with the following elements:

- Navigation icons: Back, Forward, Refresh, Home.
- Address bar: brians3.sgedu.site/mod9assignment9/admin/config/people
- Admin toolbar: Back to site, Manage, Shortcuts, brianlb.
- Configuration tabs: Content, Structure, Appearance, Extend, Configuration (selected), People, Reports, Help.
- Configuration settings:

**Anonymous**  
The name used to indicate anonymous users.

**ADMINISTRATOR ROLE**

**Administrator role**  
Administrator

This role will be automatically assigned new permissions whenever a module is enabled. Changing this setting will not affect existing p

**REGISTRATION AND CANCELLATION**

**Who can register accounts?**

- ☒ Administrators only
- ☐ Visitors
- ☐ Visitors, but administrator approval is required

☒ Require email verification when a visitor creates an account  
New users will be required to validate their email address prior to logging into the site, and will be assigned a system-generated pa: disabled, users will be logged in immediately upon registering, and may select their own passwords during registration.

☒ Enable password strength indicator

**When cancelling a user account**

- ☒ Disable the account and keep its content.
- ☐ Disable the account and unpublish its content.
- ☐ Delete the account and make its content belong to the *Anonymous* user.

Users with the *Select method for cancelling account* or *Administer users permissions* can override this default method.

## 2. SCREEN CAPTURE – Backend Article nodes Title and Tags

Edit an Article you created and take a screen capture the top title, tags

The screenshot shows the Drupal 8 backend interface for editing an article. The top navigation bar includes links for Manage, Shortcuts, and the user profile (brianlb). The main content area is divided into two columns. The left column contains the article's title and body text. The right column contains various settings and metadata.

**Title:** How Using Live View Can Improve Your Photos

**Body (Edit summary):**

photographers don't use. There are practical reasons for this - holding the camera away from your face to look at the live view screen means you don't have as stable a base for taking photos. At the same time, viewing the scene through the viewfinder rather than the LCD panel allows you to track moving subjects with greater ease, be that your kids playing in the park or a deer prancing across a field.

Despite this, live view can help you improve your photos in many tangible ways. Let's explore a few benefits of utilizing live view.

There are a lot of elements that are critical to the success of a photo, and being in sharp focus is one of them. When looking through your viewfinder, there are focus points visible to help you determine where your camera is trying to focus. But even today's autofocus systems - which are better than ever - aren't infallible. They might not get far-off subjects totally in focus, and if the subject isn't within one of the focus points, it can be difficult to get the subject super sharp.

But when using live view, these problems are circumvented because you can zoom in on the subject (or another specific area in the frame) to inspect it for sharpness. That magnified view gives you an added layer of protection from blurry photos. Naturally, using this technique requires that your camera be mounted on a tripod or another stable surface so the camera remains absolutely still as you zoom in.

The optical viewfinder on your camera does not show you an accurate representation of depth of field. Rather than showing the actual depth of field based on the camera settings you've dialed in, the optical viewfinder shows what the image would look like at your lens' widest aperture. The reason this is the case is because

How Using Live View Can Improve Your Photos

<https://www.photographytalk.com/photography-articles/6974-how-using-live-view-can-improve-your-photos>

Live view is a handy feature that many DSLRs and mirrorless systems have, yet many photographers don't use. There are practical reasons for this - holding the camera away from your face to look at the live view screen means you don't have as stable a base for taking photos. At the same time, viewing the scene through the viewfinder rather than the LCD panel allows you to track moving subjects with greater ease, be that your kids playing in the park or a deer prancing across a field.

Despite this, live view can help you improve your photos in many tangible ways. Let's explore a few benefits of utilizing live view.

There are a lot of elements that are critical to the success of a photo, and being in sharp focus is one of them. When

The screenshot shows a web browser window with the address bar displaying `brians3.sgedu.site/mod9assignment9/photography-insurance-policies`. The website has a header with a logo 'Assignment 9 DB' and social media icons. A navigation bar includes 'Home', 'The Brown Elephant', and 'The Green Blue Door'. The main content area shows a post submitted by 'brianbg' on Tue, 03/05/2019 - 01:01. The post features a photo of a bird on a rock with the word 'BIOGRAPHY' overlaid. The title of the post is 'Your Guide to Essential Photography Insurance Policies'. The text of the post discusses the importance of insurance for professional photographers, covering general liability, property, and miscellaneous liability. It includes a paragraph about the benefits of a business personal property policy and a paragraph about the importance of a miscellaneous liability insurance policy. The post is tagged with 'Photography' and 'Insurance'.

### Your Guide to Essential Photography Insurance Policies

For everyday people, insurance is a topic that can be a little confusing, if not overwhelming. For professional photographers, that confusion can be even more evident as the types of policies you need to cover your professional activities are often different (and in addition to) insurance policies that cover personal things like your home.

With that in mind, we've put together this quick primer on common policies obtained by professional photographers, from protection against injured clients to damaged gear to catastrophes that destroy your workspace.

Let's begin!

#### General Liability Insurance

A general liability policy is a must-have for any professional photographer because it protects you should a client or potential client (or anyone else, for that matter) get injured while on your property. Whether they slip and fall on some ice on the sidewalk, trip over the threshold and fall, or get injured when a studio light falls over and hits them, a liability policy will have you covered, in many cases up to \$2 million per occurrence. That's great peace of mind!

bills. Simply getting the dates confused and missing a photo shoot with clients could spell disaster as well.

Fortunately, miscellaneous liability insurance covers you in these and other situations in which there is an error, omission, or negligence on your part. Without this kind of coverage, you run the risk of being unprotected in the event that something goes awry. No matter how much confidence you have in your abilities, something at some point will go **wrong, making having a miscellaneous liability insurance policy a smart business move.**

The beauty of a business personal property policy is that no matter how the damage occurs, your policy will cover you for replacement gear or repairs up to the limits you select. Policies are based on your specific needs, with \$1 million or more in available coverage.

3. SCREEN CAPTURE – Backend screen capture of the Structure > Content types > Manage Fields for the Content type you added the Address field to

The screenshot shows the Drupal 7 administration interface. The browser address bar displays `brians3.sgedu.site/mod9assignment9/admin/structure/type`. The top navigation bar includes links for 'Back to site', 'Manage', 'Shortcuts', and the user 'brianlbg'. Below this is a secondary navigation bar with tabs for 'Content', 'Structure', 'Appearance', 'Extend', 'Configuration', 'People', 'Reports', and 'Help'. The main content area is titled 'Manage fields' and contains four sub-tabs: 'Edit', 'Manage fields', 'Manage form display', and 'Manage display'. The breadcrumb trail reads 'Home » Administration » Structure » Content types » Simple GMap'. A '+ Add field' button is located above a table listing the fields for the 'Simple GMap' content type.

LABEL	MACHINE NAME	FIELD TYPE	OPERATIONS
Address	field_address	Text (plain)	<a href="#">Edit</a>
Body	body	Text (formatted, long, with summary)	<a href="#">Edit</a>

[H03]

4. SCREEN CAPTURE – Backend screen capture of the Structure > Content types > Manage Display for the Content type you added the Address field to

The screenshot shows the Drupal administration interface. The top navigation bar includes links for Back to site, Manage, Shortcuts, and the user profile (brianlb). Below this is a secondary menu with Content, Structure, Appearance, Extend, Configuration, People, Reports, and Help. The main heading is "Manage display" with a star icon. Underneath are four tabs: Edit, Manage fields, Manage form display, and Manage display (which is active). There are two sub-tabs: Default (active) and Teaser. A breadcrumb trail reads: Home » Administration » Structure » Content types » Simple GMap. The text explains that content items can be displayed using different view modes: Teaser, Full content, Print, RSS, etc. It notes that Teaser is typically used in lists of multiple content items, while Full content is used when the content is displayed on its own page. It states that here, you can define which fields are shown and hidden when Simple GMap content is displayed in each view mode, and define how the fields are displayed in each view mode. A link "Show row weights" is visible on the right. Below this is a table with three columns: FIELD, LABEL, and FORMAT.

FIELD	LABEL	FORMAT
+ Links		
+ Body	- Hidden -	Default
+ Address	Above	Google Map from one-line address

In the bottom right corner, there is information about a dynamic map: Dynamic map: 100% x 300, Map Type: Map, Zoom Level: 14, Language: en, and a gear icon for settings.

[H04]
